

Grow Out Mix 300

Product Description

A coarse-textured growing media designed for applications requiring increased drainage and aeration. Ideal for growers needing precise control over irrigation and nutrient programs.

Formulated With

- Coarse Canadian Peat Moss
- Coco Coir
- Coarse Perlite
- Dolomite Limestone (pH adjustment)

Engineered For

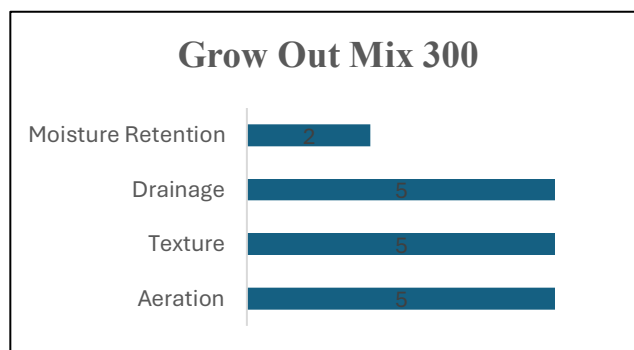

- Container growing and finishing stages
- Applications requiring increased drainage
- High-frequency irrigation programs

Physical Properties

- **Moisture Retention:** Low to Moderate
- **Drainage:** High
- **Texture:** Coarse
- **Aeration:** High

Performance Characteristics

- Supports efficient water movement through media
- Provides increased air space for root growth
- Maintains structure through irrigation cycles
- Helps reduce risk of over-saturation

Relative scale shown for comparison purposes only.

Available Formats

- Bulk (loose material)
- Supersack (upon request)

Add-On Options

Available upon request:

Silicon · Wetting Agent (Standard or Organic) · Worm Castings · Mycorrhizae · Kelp · Vermiculite · Starter Charge · Bat/Bird Guano · Pumice · Custom Additions

Important Information

This product is a blended growing media. Composition may vary due to the natural variability of raw materials. Product is not intended to provide significant plant nutrition.
