

Nursery Mix 200

Product Description

A balanced growing media designed for consistent plant performance across a wide range of applications. Provides moderate drainage with reliable water-holding capacity and uniform structure.

Formulated With

- Coarse Canadian Peat Moss
- Coco Coir
- Coarse Perlite
- Dolomite Limestone (pH adjustment)

Engineered For

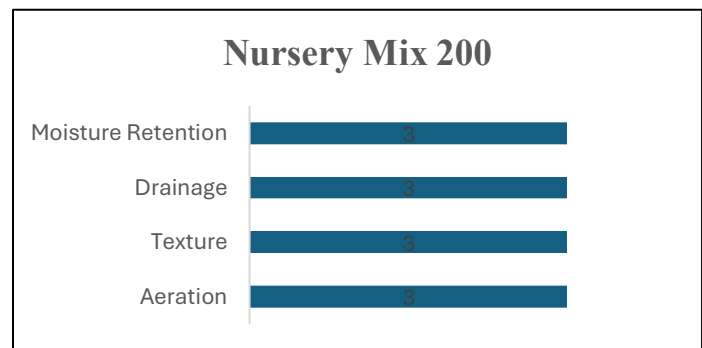

- General nursery production
- Container planting
- Applications requiring balanced moisture retention and drainage

Physical Properties

- **Moisture Retention:** Moderate
- **Drainage:** Moderate to High
- **Texture:** Medium
- **Aeration:** Moderate

Performance Characteristics

- Provides consistent media structure across applications
- Supports predictable irrigation response
- Maintains uniform air space within media
- Balances water retention and drainage

Relative scale shown for comparison purposes only.

Available Formats

- Bulk (loose material)
- Supersack (upon request)

Add-On Options

Available upon request:

Silicon · Wetting Agent (Standard or Organic) · Worm Castings · Mycorrhizae · Kelp · Vermiculite · Starter Charge · Bat/Bird Guano · Pumice · Custom Additions

Important Information

This product is a blended growing media. Composition may vary due to the natural variability of raw materials. Product is not intended to provide significant plant nutrition.
